Response to Arguments

Applicant's arguments filed 01/07/03 have been fully considered but they are not persuasive. The present application has different claims than the parent application now USP 6,249,073. The art cited reads on the claims as detailed in the Final Rejection of paper 6. While inventiveness has been described in the claims of the parent case, that is not true in this case. No arguments or amendments have been offered to overcome or dissuade the Examiner of the efficacy of paper 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 7-9, 11, 13, 15 and 19-32 are rejected under 35 U.S.C. 102(b) as being anticipated by the Nguyen et al. article "Design and Performance of CMOS Micromechanical Resonator Oscillators". See paper 6 for the body of the rejection which remains the same.

Claims 1-13 and 15-28 are rejected under 35 U.S.C. 102(b) as being anticipated by the Lin et al. (US 5,537,083). See paper 6 for the body of the rejection which remains the same.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2834

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lin et al. (US 5,537,083) in view of either ordinary skill in the art or Ella (US 6,278,342). See paper 6 for the body of the rejection which remains the same.

Conclusion

This is a continuation of applicant's earlier Application of the same Application Number. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Direct inquiry concerning this action to Examiner Dougherty at (703) 308-1628.
